EDUCATION

HND in Computer Science with Artificial Intelligence

NIBM - KIC, Sri Lanka

2024 – Present

- Diploma in Computer Science with AI
- Second-year undergraduate student

Software Engineering and AI Course

C-Clarke International Institute, Sri Lanka

2026 – Present

G.C.E. Advanced Level - Physical Science Stream

Pinnawala Central College, Rambukkana

2021 – 2023

ACADEMIC PROJECTS

Travel Website with ML Integration

HTML, CSS, JavaScript, Python & FastAPI

2025

Individual

- Developed a responsive travel website with a machine learning prediction feature.
- Built a weather prediction system using Random Forest models to predict weather conditions, temperature, and wind speed based on city and month inputs.

AI-Powered Vehicle Recommendation Web Application

Python & Machine Learning

2026

Individual

- Built an ML-based system to recommend vehicles based on user preferences.
- Implemented a Gradient Boosting Regression model to predict vehicle prices and rank vehicles.

Persistent Identity Tracker System

YOLOv8, Python & FastAPI

2026

Individual

- Built a real-time computer vision system for person detection and tracking using YOLOv8, feature-based re-identification, gait analysis, and unknown-person labeling, with a live monitoring dashboard.

Smart Event Planner

React, TypeScript & AI

2026

Individual

- Created an AI-powered planner that converts event descriptions into structured data.
- Developed reusable components, custom hooks, and a responsive UI following a modular frontend architecture.

Next.js Portfolio Website

Next.js, TypeScript, Tailwind CSS & Framer Motion

2026

Individual

- Created a professional portfolio website with responsive layouts, dark/light mode, animated sections, service accordion, and project showcase pages.
- Implemented reusable React components, dynamic project data, smooth page transitions, and optimized mobile user experience.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern

HONO Engineering

2026 – Present

Sri Lanka

- Working on a full-stack e-commerce platform using Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL, and Better Auth.
- Implemented authentication, admin panel, product management, cart, wishlist, pre-orders, wholesale pricing, subscriptions, invoices, and payment gateway integration.
- Used GitHub, Vercel, Neon database, and environment variables for deployment and project configuration.
